PROFESSIONAL SUMMARY

AI & ML undergraduate with foundational knowledge in machine learning and web development. Familiar with Python, Scikit-learn, TensorFlow, and React.js, and have built basic projects by applying learned concepts. Completed 5+ academic and personal projects including an NLP-based spam classifier. Eager to strengthen technical skills and gain real-world experience through internship or entry-level opportunities in AI/ML or Web Development.

TECHNICAL SKILLS

Programming: Python(Basic) , C

Machine Learning : Scikit-learn, TensorFlow, Pandas, NumPy, Python(Fundamentals)

Web Development: React.js(Basic), HTML5, CSS3, Tailwind CSS, Supabase, SQL(Basic)

Tools & Platforms: Git, GitHub, VS Code, Firebase, Netlify

PROJECTS

Spam Email Classifier | Machine Learning

PERSONAL PROJECT

- Built an NLP-based spam detection model using TF-IDF vectorization and Scikit-learn algorithms.
- Achieved 90%+ accuracy on test dataset.

 [Github Project Link](#)

Medical Recommendation System | AI/ML

PERSONAL PROJECT

- Developed a disease-based recommendation system using classification models.
- Performed data preprocessing, feature engineering, and hyperparameter tuning.

 [Github Project Link](#)

Road Safety Learning Platform | Full Stack Application

GROUP PROJECT

- Built a responsive learning platform explaining traffic rules and safety systems.
- Implemented authentication and dynamic content using React.js and Supabase.

INTERNSHIP EXPERIENCE

Web Developer Intern(Saiket Solutions)

(May 2025 - June 2025)

- Developed responsive web applications using HTML5, CSS3, JavaScript, and React.js.
- Optimized UI performance and implemented dynamic features to enhance user experience.

AI & ML Intern - Microsoft Edunet (Remote)

(April 2025 - May 2025)

- Built classification and regression models using Scikit-learn and TensorFlow.
- Completed 2 capstone ML projects.

Frontend Developer Intern - Codtech It Solutions (Remote)

(April 2024 - May 2024)

- Built and maintained scalable frontend applications using React.js and Supabase.
- Improved interface performance and reduced frontend bugs by 25%.

EDUCATION

B.Tech in Computer Science (AI & ML)

2023 - 2027

Vignan's Institute of Information Technology Autonomous

CGPA: 8.2+ as of 2026

CERTIFICATIONS

IBM - Machine Learning

HCL - AI Fundamentals

Cisco - Front-End Web Development (HTML, CSS, JS)

Python Certification - Sololearn

ACHIEVEMENTS

OpenAI x NxtWave Ideathon Finalist

Campus Ambassador - Unstop (2026)

5+ Live Projects Deployed on GitHub & Netlify

LANGUAGES

English - Professional Proficiency

Telugu - Native
